

## Water Cycle Song

Here are some fun lyrics to help you remember the four stages of the Water Cycle. The tune is from an old song called 'Locomotion'. Your parent/guardian may be familiar with this song so they can teach you the tune but if not, look it up and have a listen first so you can sing these new words to it. Feel free to come up with your own water cycle dance too!

**All the water's going through the Water Cycle  
Come on water, start evaporating.**

**Water turns to vapour and it's floating on air now  
Come on water, this is condensation.**

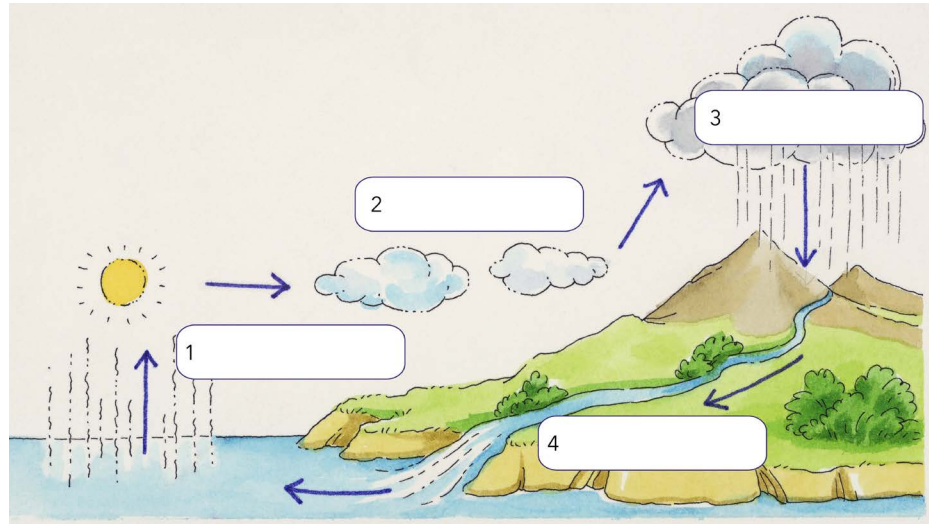

**Next we see rain falling, that's precipitation  
The water flows into the ground, it's infiltration.**

**So come on, come on, do the Water Cycle again.**

# The Water Cycle

Now that you're an expert on the Water Cycle, why not fill in the four different stages that you have learned about:

# Jokes

**What did the sea say when the water evaporated?**

It will be mist.

**What is a Queen's favourite type of precipitation?**

Reign!

**What did the condensation say to the cloud when it kept nagging him?**

Just drop it.
